

## RESEARCH FINDINGS

Ph.D STUDENT: NGUYỄN TỪ ĐỨC Born on: 01/8/1978

Dissertation topic: **A STUDY OF ACTUAL STATUS AND ELIGIBLE SOLUTIONS IN FOREST LAND ALLOCATION TO ETHNIC MINORITIES IN LE THUY AND QUANG NINH DISTRICTS, QUANG BINH PROVINCE**

Discipline: Land Management Code: 62.85.01.03 Class: 2015

Supervisor: Assoc. Prof. Dr Huỳnh Văn Chương

Training unit: Hue University of Agriculture and Forestry

### FINDINGS:

- The PhD research is a scientific work which is studied under the new policy orientation of 2013 Land Law, clearly defining the State's responsibility for land for ethnic minorities with the viewpoint that "Adopting policies which creates conditions for ethnic minority people who directly make agricultural production in rural areas with agricultural production land."

- The state agencies' data sources on land use management are often determined by traditional measurement methods. The study applies GIS and Remote Sensing to analyze forest land variability during the phase of 2005 - 2015 in the study area, also the assess actual status of forest land use, management and transition in socio-economic in the area.

- The study clarifies the actual status of ethnic minorities' utmost need over forest land; maps out 4 suitable solutions related to forest land allocation over ethnic minorities, which is plausible to implement on spot.
